(786) 395-1489

Passionate software developer with a knack for building applications and generating actionable insights

## SKILLS

**Programming Languages** Python, Java, JavaScript, HTML, CSS, SQL

**Frameworks & Libraries** React, Node.js, Express.js, Bootstrap, Pandas (Tableau, Power BI, Alteryx)

**Languages** English, Spanish

## EXPERIENCE

TD Bank

**Software Engineer | Data Analyst** (December 2022 - Present)

- Utilize Python scripting to automate data extraction from various platforms (Jira, Bitbucket, GitHub, SonarQube, ServiceNow) to consolidate information into a centralized repository.
- Employ Python libraries, SQL, and Excel to clean, manipulate, and transform extracted data, ensuring its accuracy and usability for analysis.
- Create insightful and visually appealing Tableau and Power BI dashboards that empower stakeholders with answers and fresh perspectives.
- Establish cross-departmental relationships to provide data insights and encourage colleagues to apply data-driven approach to decision making.

Data Products

**Web Developer** (Jun 2022 - Sep 2022)

- Responsible for both back-end and front-end development, including the implementation of WordPress themes and plugins. Create and convert mocks into functional websites

Duke AI

**Software Developer** (Mar 2022 - Nov 2022)

- Improved the machine learning capabilities of Duke.AI, applying data extraction and interpretation of unstructured documents, converted into structured data input to ML model, using Python, Jupyter Notebook, and GitHub.

Prismart Graphic

**Web Developer | Salesforce Administrator** (Jul 2020 - Dec 2022)

- Design, develop and deploy responsive websites using either WordPress or static websites
- Build custom objects, workflows, process builders, approval rules, sharing rules, permission sets, page layouts, custom views, reports, and dashboards on Salesforce

CMH United

**Senior International Account Executive** (Feb 2006 - Jul 2020)

- Provide ongoing account management, business consulting and product support to overseas customers
- Manage and train new sales representatives on company offerings, client portfolio, Microsoft Office Suite and other administrative or operational software
- Responsible for developing and further maintaining company websites and promotional landing pages to generate new leads leveraging APIs to integrate each landing page with Zoho CRM and Google Ads
- Create Python programming scripts that auto-generate dynamic sales and inventory reports
